

To order a project, please consider the following Items:

- 1) All conversations should be written and sent by **e-mail**. (Email: twoDarc.studio@gmail.com)
- 2) To avoid probable ambiguities during the project, **only one person** should be in touch with us (If the project is for a group or company, a representative should be chosen for correspondence.)
- 3) The delivery date of the project will be calculated from the time that **all the necessary documents** is provided.
- 4) Prices are calculated on the basis of the **initial design**, which is received from the customer; if it changes, the price would be change too.
- 5) **Designing, modeling, rendering, creating virtual tour, poster designs and animation** costs will be calculated separately.
- 6) **The design** cost is estimated according to the **design cost regulation**. If design required, the pdf file will be send.
- 7) **The minimum modeling cost** is **50USD**. This means that depending on the type of project, the amount of detail and complexity, project area, required modifications, timing and delivery time, etc., the modeling price will be calculated.

- 8) The **number** and **quality** of "**renders**" determines the final price. (The area of the project is not a criterion!)
- 9) Each **single-frame** rendering with **4k quality (3840*2160)** costs **100USD**
- 10) Each **single-frame** rendering with **8k quality (7680*4320)** costs **150USD**
- 11) Each **360-degree** rendering with **4096*2048** quality costs **200USD**
- 12) Each **360-degree** rendering with **8192*4096** quality costs **300USD**
- 13) Renders are **without post-production** (without editing in Photoshop).
- 14) The cost of doing a post-production in Photoshop for each render is **50USD**
- 15) These prices are fixed amount and does not change in different projects.
- 16) All test renders will present in **WXGA quality (1280 x 720)** and **with watermark**. After the full payment has done, the render files will be delivered in required quality and without watermark.

- 17) **Animation duration** and its **quality** determines the final cost. (The area of the project is not a criterion!)
- 18) Designing (if needed) and modeling costs are calculated separately as it mentioned before.
- 19) 30 second walk-through animation with **HD (1280*820)** quality costs **300USD**
- 20) 30 second walk-through animation with **Full HD (1920*1080)** quality costs **400USD**
- 21) 30 second walk-through animation with **Quad HD (2560*1440)** quality costs **500USD**
- 22) 30 second walk-through animation with **Ultra HD(4K) (3840*2160)** quality costs **600USD**
- 23) These prices are fixed amount and does not change in different projects.
- 24) Animations with less than 30 second duration will consider as 30 second.
- 25) All test animations will present in **nHD quality (640 x 360)** and **with watermark**. After the full payment has done, the render files will be delivered in required quality and without watermark.

- 26) The **number of renders** determines the **VR (Virtual Tour)** price. (The area of the project is not a criterion!)
- 27) Virtual Tour creation needs at least two 360-degree render.
- 28) Virtual Tour creation for **1 to 4** panorama renders costs **200USD**
- 29) Virtual Tour creation for **5 to 8** panorama renders costs **300USD**
- 30) Virtual Tour creation for **9 to 12** panorama renders costs **400USD**
- 31) Virtual Tour creation for **13 to 15** panorama renders costs **500USD**
- 32) Virtual Tour creation for **16 to 18** panorama renders costs **600USD**
- 33) Virtual Tour creation for **19 and more** panorama renders costs **700USD**
- 34) These prices are fixed amount and does not change in different projects.

- 35) The **number** of **posters** and their **size** determines the costs.
- 36) Poster design with size **50*70 (CM) / A1** costs **80USD**, which is a fixed sum and does not change in different projects.
- 37) Poster design with size **100*70 (CM) / A0** costs **150USD**, which is a fixed sum and does not change in different projects.
- 38) Poster design with **90 (CM) height** for one-meter costs **200USD**, which is a fixed sum and does not change in different projects.
- 39) These prices are fixed amount and does not change in different projects.

- 40) The prices given are based on the final presentation, the **type of rendering engine** will not affect the price and only the **output of the work** is on the agenda.
- 41) Initially, the employer specifies the **number of requested renders or duration of animation**, then the modeling will be done in the form of **single material** and **more views** will be provided than the employer requests. After the final confirmation of the views, the number of renders and duration of animation, the final cost of the project will announce, and at that time 50% of the cost will be received to continue the work. Then the material, lighting and rendering will be done. Finally, when renders and animations delivered, the remaining amount will be received.
- 42) Based on the employer's request, **partial modifications** (light or material changes, small modeling modifications) will be **free of charge for 3**, more than that, the cost of **each partial change** will be **50USD**.
- 43) Based on the employer's request for **general amendments** (any changes that are not considered as partial), the cost of **each general change** is **100USD**.
- 44) **A major change in the project design**, will considered as a **new project**, therefore the delivery time will change. The cost of both projects will be separately received.
- 45) In case of **cancelation**, the initial fee will not be refunded.
- 46) **Urgent projects** (deliveries announced early, requiring overnight delivery) are **2 times the normal price**.
- 47) In case of employer's request for model **file in the 3D software**, the expense of the modeled file is **500USD**.
- 48) If the cost of rendering and animation exceeds **1000USD**, free modeling costs are considered and the modeling file will be delivered free of charge to the employer.
- 49) If it is a **student project**, get a **10% discount** on the final amount by presenting a **valid student card**.
- 50) The discounts offered are in **normal situation** and no discounts will be charged if a project is ordered as an **urgent project**.

✓ **Ordering the project constitutes acceptance of all the above by the employer.**
